Updating Adobe Reader

Updating Adobe Reader is important for viewing PDF files. Many of our reports in Skyward, Eduphoria, and the Curriculum Site are in PDF format. Here's how:

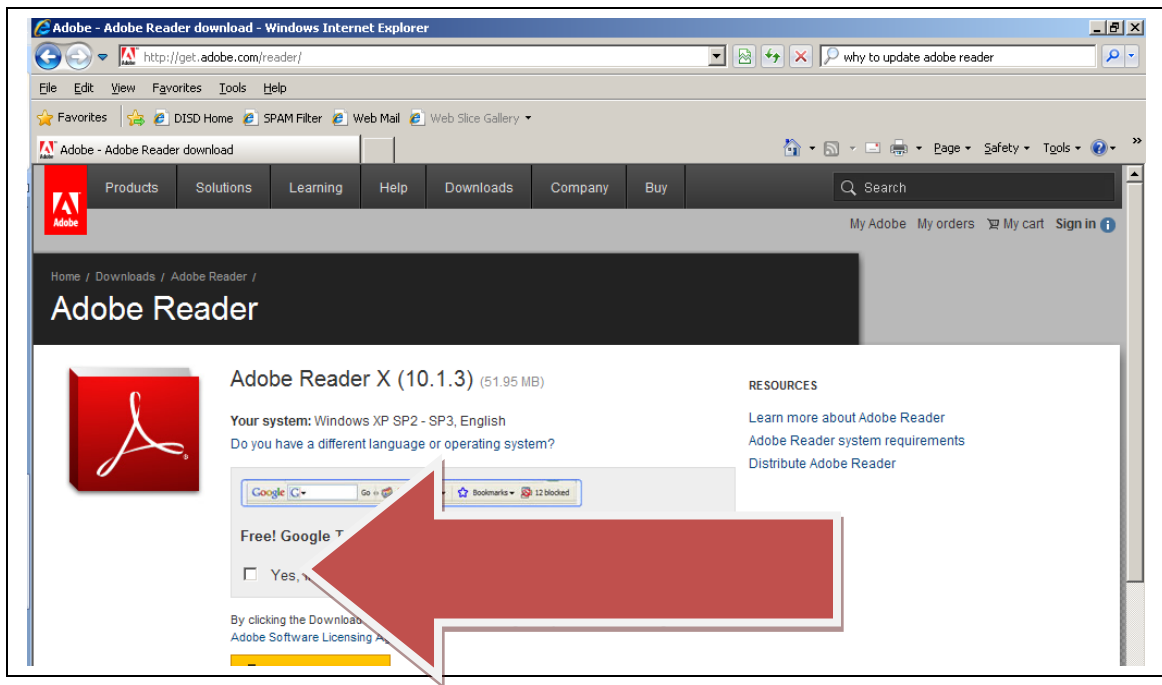

1. Go to www.adobe.com/downloads

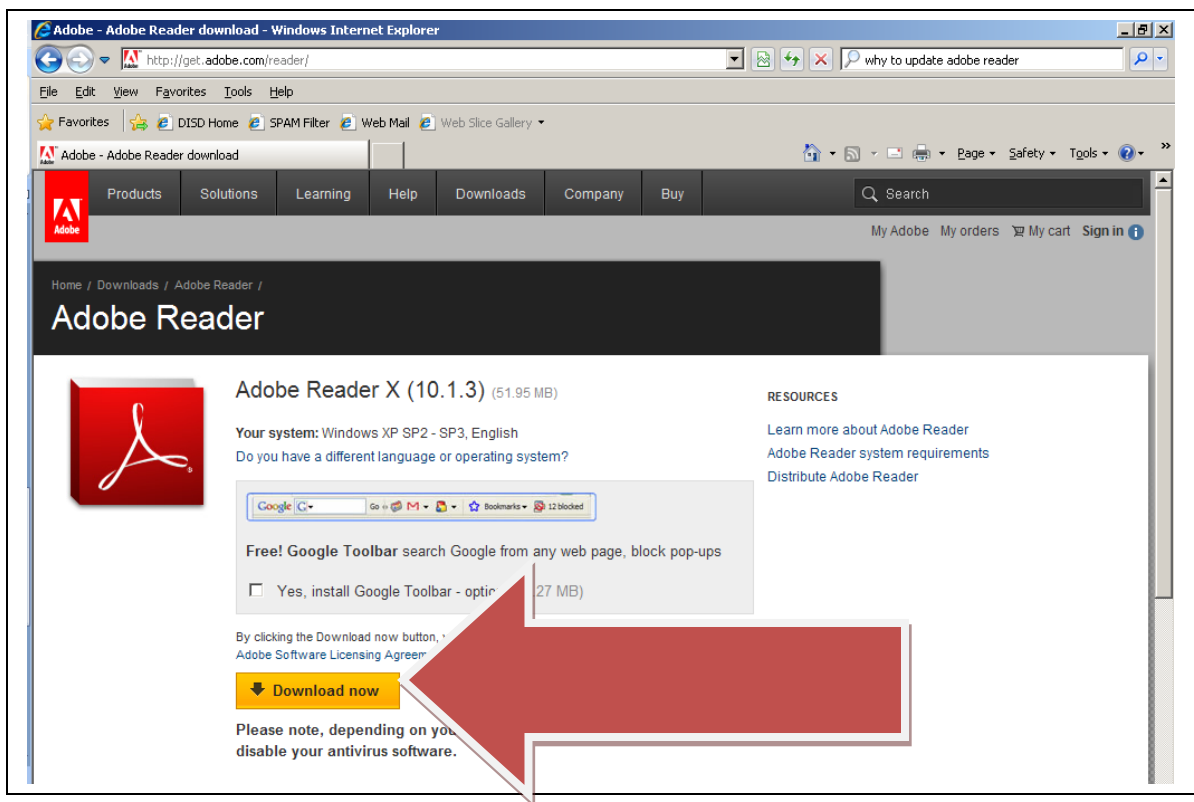

2. Click on Get Adobe Reader.

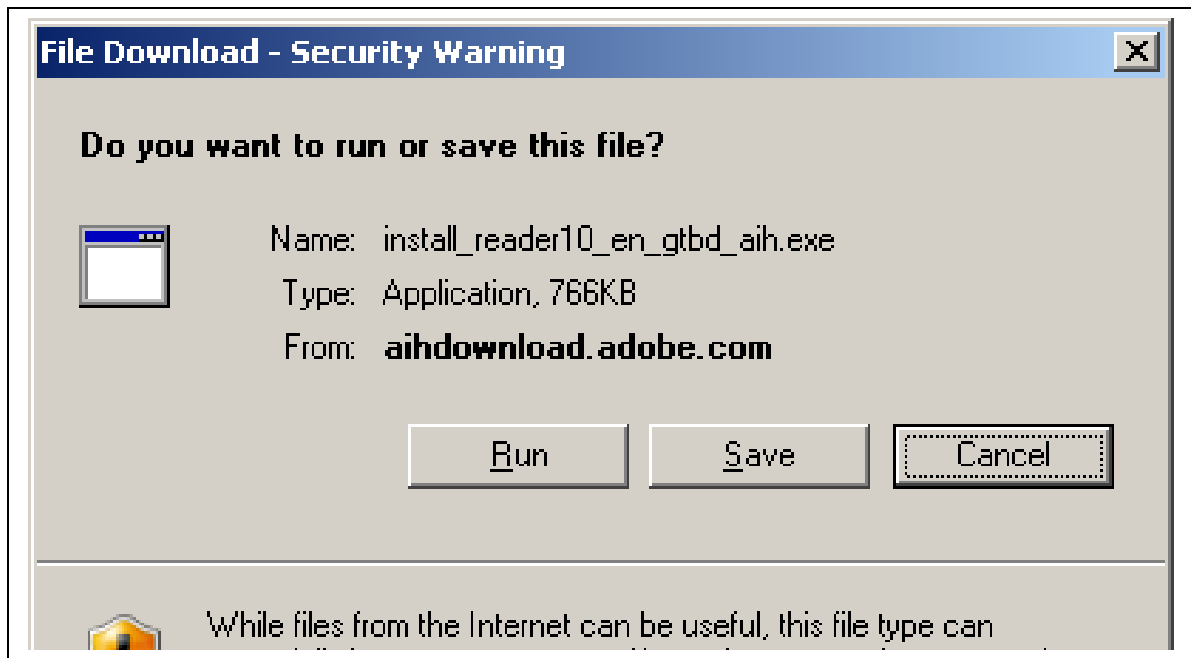

3. **UNCHECK** “Yes, install Google Toolbar – optional.” You do not need this free add-on that takes up valuable real estate on your web browser.

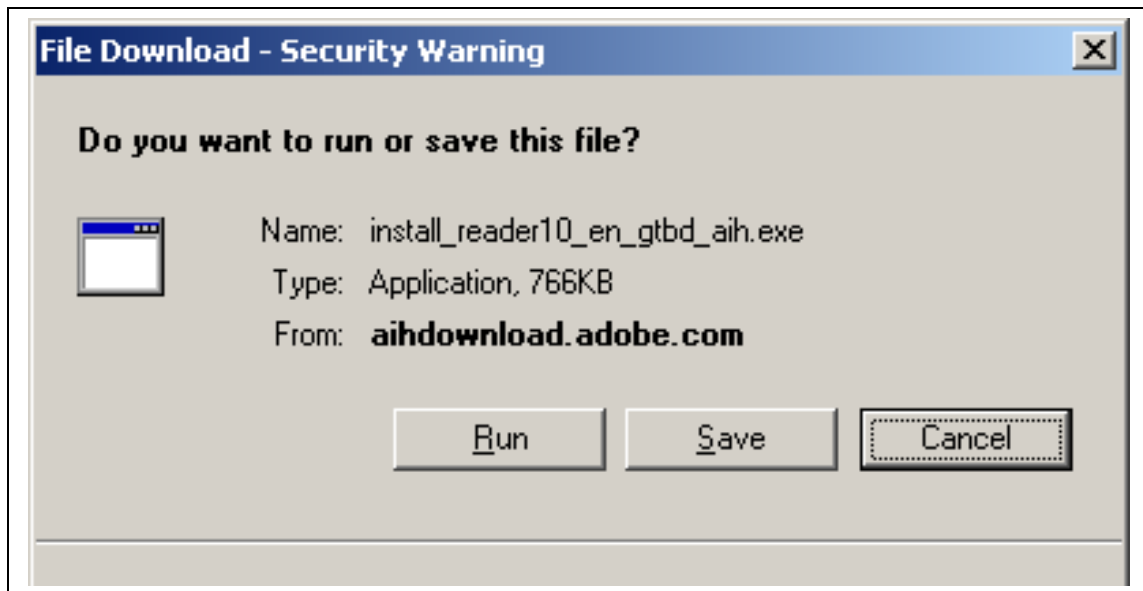

4. Click Download now.

5. Click Run.

6. Click Run again.

7. You will need to close out of your web browser and all programs. You may be prompted for the update. Click next, yes, or ok if that is the case. Click Finish when the installation is complete.
